CONTENTS FOR
SOVIET JOURNAL OF APPLIED PHYSICS
Volume 1, Nos. 1-6, 1987

Number 1

1 Radiative-Conductive Heat Transfer in a Porous Solid
A.L. Burka and Ye.P. Chirkashenko

7 Numerical Modeling of Conjugate Radiative-Conductive Heat Transfer in the Shielded Space of an Electric Arc Furnace Operating under a Vacuum
V.M. Kutsenko, L.N. Maksimov and A.N. Cherepanov

18 Optimization of Parameters of Radiant Heaters by Solution of the Inverse Problem
Ye.K. Belonogov and I.S. Vinogradov

27 Radiant Heat Transfer in a Cavity with Correction for Loss of Heat through the Cavity Wall
Yu.A. Popov

35 The Ratio of Heat Fluxes on a Wall in the Case of Phase Transition
B.F. Boyarshinov and V.I. Terekhov

45 Effect of Geometry of the Distributor Grid on the Rotational Velocity of a Bubbling Bed
A.P. Burdukov, V.I. Kazakov and G.G. Kuvshinov

54 Parameters of Supersonic Jets in Cocurrent Flow
N.M. Terekhova

62 Effect of Different Methods of Injection of Hydrogen on Completeness of Its Combustion in a Supersonic Air Flow
V.A. Zabaykin and A.M. Lazarev

71 Flow over a Polygonal Lifting Configurations at Supersonic Velocities
I.I. Mazhul'

78 An Electric Plasma Jet in a Transverse Magnetic Field
Yu.V. Tushko

89 Current Density, Electric Field Strength and the Cooling Effect of Electron Emission of Thermal Cathodes of Gas Arcs
V.N. Anikeyev, V.M. Vinogradov, V.N. Lunichev and A.Z. Shavernev

97 Investigation of Heat Transfer from a Plasma Jet to Cylindrical Bodies and a Plane Wall
S.V. Dresvin, S.A. Mel'nik and S.M. Mikhal'kov

111 Thermal Strengthening of Soft Rock by Means of Low-Temperature Plasma
G.A. Zadvornev, V.N. Yakunin and V.F. Novikov

120 Contribution to the Theory of Transient Processes in a dc Arc
Yu.G. Ionov

126 Effect of Subsequent Heat Treatment on the Structure and Properties of Medium-Carbon Steel Subjected to a Strong Shock Wave in Air
V.I. Kirko and V.V. Malyshev

132 Relationships Governing Liquid Exchange in Dispersed-Annular Flow of Two-Phase Mixtures. A Survey
S.I. Ivandayev

147 Numerical Analysis of the Dynamics of Intake Air in Combustion Chambers of Internal Combustion Engines
O.N. Lebedev, N.N. Sergeyev-Al'bov and S.N. Chirkov

156 Optimization of the Siting and Strength of Pollution Sources on the Basis of Models of Pollutant Transport in the Atmosphere
V.V. Penenko and V.F. Raputa

165 Methods and Instruments for Measuring the Thermophysical Properties of (Frozen) Soils
V.S. Zaytsev

170 Optimal Structures of Layered Filters for Thermal and Acoustic Waves
G.D. Babe, Ye.L. Gusev and Yu.S. Urzhumtsev
179 A Viscoelastic Model of Solidification of a Liquid in a Spherical Vessel, Incorporating the Description of the Phase Diagram
M.M. Dubina and A.G. Tomskiy
188 Comparative Analysis of Breakdown Strengths of Electrically Insulating Air Gaps
V.M. Makarov, V.Ya. Smolyakov and A.I. Sokolov

Number 2

1 A Mathematical Model for Inversion of the Problem of Radiative-Conductive Heat Transfer in a Semitransparent Scattering Medium so as to Obtain the Temperature Behavior of the Thermal Conductivity Coefficient
P.V. Prosuntsov and S.V. Reznik
9 Effect of Scattering on Transient Radiative-Conductive Heat Transfer in a Two-Layer System
N.A. Rubtsov and Ye.P. Golova
17 Evaluation of Radiant Heat Transfer with Correction for Anisotropy of Optical Parameters
V.N. Adrianov
24 Flow and Heat Transfer in Condensation of Immobile Vapor on a Horizontal Cylinder
I.I. Gogonin
33 Prediction of the Effect of a Flare on Permafrost
N.A. Rubtsov, Yu.S. Danielyan, V.B. Gamarnik and S.A. Varichenko
38 Possible Nonperturbing Motion of a Body in a Fluid
V.I. Merkulov
46 Derivation of Equations of Motion of Discrete Vortex Particles for Axisymmetric Flows
A.N. Verententsev, P.A. Kuybin, V.I. Merkulov and V.Ya. Rudyak
52 Drying of Permeable Sheets by Impinging Jets and Arranging the Sheets to Form Cavities
O.L. Danilov, V.I. Kosenkov, E.D. Sergievskiy and Ye.S. Stepanova
57 Investigation of the Spreading of a Plane Liquid Jet over a Plate
V.A. Yermakov, V.V. Bondarik and N.V. Skorik
62 Investigation of Swirled Flow in a Cylindrical Duct with a Smooth Inlet
A.P. Burdukov, A.R. Dorokhov and V.I. Zhukov
67 Aerodynamics of a Three-Cell Cooling Tower
V.M. Kovalenko and V.V. Larichkin
76 Flow Structure in the Initial Zone of an Arc in Axial Gas Flow
A.D. Lebedev, Yu.V. Tushko and A.S. Chiganov
84 Calculation of the Parameters of the Positive Column of a Glow Discharge with Correction for Internal and Intrinsic Ionization in Turbulent Gas Flow
F.M. Gaysin
93 A 2.5 kW Industrial Laser
V.K. Golov, A.I. Ivanchenko, V.V. Krasheninnikov, A.G. Ponomarenko, A.A. Shepelenko and V.B. Shulyat'yev
99 Determination of the Position and Strength of a Pollution Source
V.F. Raputa and A.V. Panarin
105 Modeling of Steady-State Operations of Power Systems under Fuzzy Conditions
V.Z. Manusov and I.L. Ozernykh
112 Invariance of the Relative Dielectric Strength of Electrical Insulation Gaps in the Case of Their Scale Transformation
V.M. Makarov, V.Ya. Smolyakov and A.I. Sokolov
119 Improvement of Analytical Methods for Probabilistic Analysis of Steady-State Operation of Power Systems at Maximum Loads
Yu.N. Kucherov
127 Correction for the Actual Current Density in Grounding Calculations
E.L. Kats

Number 3

1 Transient Radiative-Conductive Heat Transfer in a Layer of Scattering Medium
N.A. Rubtsov and Ye.B. Timmerman

7 Mass Transfer from Solids to a Turbulent Liquid in an Open Vessel
V.Ye. Nakoryakov, M.S. Iskakov and O.N. Kashinskiy

13 Investigation of Upward Bubbly Flow at Low Liquid-Phase Velocities
V.Ye. Nakoryakov, O.N. Kashinskiy, B.K. Kozmenko and R.S. Gorelik

19 A Perturbation Solution of the Conjugate Problem of Transient Heat Transfer in the Vicinity of the Stagnation Point
O.P. Solenenko and A.I. Fedorchenko

25 Experimental Study of Condensation of Gasoline
A.V. Gorin and A.I. Golomyanov

29 Calculation of Steady-State Heat Transfer in the Case of a Film-Type Friction Pickup
P.I. Geshev and M.V. Lubkov

37 Coalescence of Liquid Droplets Under Nonisothermal Conditions
B.P. Avksentyuk and A.A. Bochkarev

44 Aerodynamics of a Vortex Chamber with Controlled Gas Discharge Flowrate
E.P. Volchkov, L.V. Serikov and V.I. Terekhov

51 Approximate Evaluation of the Overall Aerodynamic Parameters of Polygonal Lifting Shapes at Supersonic Velocities
I.I. Mazhul'

58 Film Condensation of a Non-Flowing Mixture of Refrigerant Vapors on Horizontal and Vertical Tubes
I.I. Gogonin, A.R. Dorokhov and V.I. Sosunov

63 The Initial Dependence of the Toms Effect in Polyethylene Oxide Solutions on Time
V.M. Kulik and B.N. Semenov

69 Energy Characteristics of Micromodular Wind Turbines
M.B. Voytsekhovskiy

76 Critical Flows in a Cylindrical Duct with a Wall-Stabilized Arc
Yu.S. Levitan

83 Production of Metal-Concrete Composites by Means of Low-Temperature Plasma
G.A. Zadvernev, A.S. An'shakov, V.N. Yakunin and V.I. Shpoltakov

88 Regenerative Cooling of Electric-Arc Heater Components by the Plasma-Generating Gas
A.V. Pustogarov, G.N. Mel'nikov, A.B. Karabut, R.Ya. Zakhrakin, B.G. Drozdov, Yu.A. Spiridonov and A.I. Vertiprakhov

93 Thermal State of a Strongly Cooled Plasma-Gun Thermal Cathode
A.S. An'shakov, G.-N.B. Dandaron, V.V. Stenin and A.P. Mozhayev

98 Dynamics of Interaction between Molten Particles and a Surface
D.A. Gasin and B.A. Uryukov

105 Atomic Configuration of Thermal Antiphase Boundaries in Ordered Alloys with $L1_2$ Hyperstructure
M.A. Sarostenkov, N.V. Gorlov and B.F. Dem'yanov

110 Algorithms of Evaluation of Complex Systems
L.A. Sheromov

115 The Mechanism of Electrical Conductance of Resistive Composite Materials
V.P. Gorelov

121 Optimization of Current Distribution among Long Distance Electric Transmission Lines and Local Distribution Networks
A.Kh. Kalyuzhnyy

128 Equations of Steady-State Operation of Transmission Lines with a Single Conductor Transposition Cycle
M.L. Levinshteyn and F.Z. Khakimov

Number 4

1 Effect of the Temperature Factor on Friction and Heat Transfer in a Turbulent Boundary Layer
O.V. Dobrocheyev, M.N. Kiselev and V.P. Motulevich

7 Turbulent Characteristics of Ascending Two-Phase Slug Flow
V.Ye. Nakoryakov, O.N. Kashinskiy, B.K. Koz'menko and R.S. Gorelik
15 Heat and Mass Transfer in the Condensation of Volatile Petroleum Products
A.V. Gorin and A.I. Golomyanov
19 Model of Transient Performance of a Heat Exchange System Employing an Intermediate Heat Exchange Fluid (Two-Stage System)
I.I. Gol'dfarb, B.I. Psakhis and V.S. Cherkasskiy
25 Supersonic Wave Drag of a Power-Law Nose Body with a Disk in Front of It
I.A. Belov, S.A. Isayev, V.N. Konovalov and A.Yu. Mitin
31 Generation of Coherent Structures in the Turbulent Wake of a Slender Plate Whose Rear Edge is Perturbed by Application of Acoustic and Vibratory Fields
S.P. Bardakhanov and V.V. Kozlov
36 Prediction of Aerodynamics of Swirled Flow in Cylindrical Ducts
A.P. Burdukov, A.R. Dorokhov and V.I. Zhukov
43 Solution of Navier-Stokes Equations by Contour Integration in u-v Variables
G.K. Malikov and Ye.M. Shleymovich
50 Flow in Porous-Wall Ducts with Step Variation in Injection Rate Along the Ducts
S.V. Kalinina
57 Self-Induced Oscillations in an Electric Arc Stabilized by a Swirled Gas Flow
M.F. Zhukov, V.P. Lukashov, B.A. Poznyakov and N.M. Shcherbik
64 An Electric Arc in a Transverse Magnetic Field
A.D. Lebedev, Yu.V. Tushko and A.S. Chiganov
71 Formation of Contracted Anode Spot in Generators of Low-Temperature Plasma
M.F. Zhukov, A.S. An'shakov, S.P. Vashchenko, G.-N.B. Dandaron and Kh.Ts. Zayatuyev
77 Structure Formation in the Course of Electron-Beam Surface Hardening of 55Kh2N2MFA Steel
M.V. Radchenko and N.I. Batyrev
83 An Algorithm of Control of Dynamic Objects of Unknown Structure
A.A. Ivanilov
90 An Algorithm for Calculating Variations of Linear and Quadratic Functionals Subject to Nonlinear Constraints
A.V. Panarin
96 Investigation of the Solidification of Water and Hydrodynamics in a Horizontal Rotating Cylinder
A.I. Tsaplin and M.A. Oshivalov
102 The Mechanism of Thermal Desquamation of Solids by Surface Heating
A.Ya. Kolodko and V.S. Nikiforovskiy
109 Experimental Study of the Behavior of an Air-Overlain Liquid in a Vibrating Vessel
Ye.D. Zaytsev and N.V. Mikhaylov
115 Vibrations of Pile Driver-Driven Metal Piles
B.F. Simonov

Number 5

1 Pressing Problems of Radiative and Combined Heat Transfer
G.B. Sinyarev
5 Solution of Inverse Problems of Heat Transfer with Allowance for *a priori* Knowledge About the Smoothness of the Function Being Reconstituted
O.M. Alifanov and I.Ye. Balashova
11 A New Approach to Problems of Radiant Heat Transfer
V.M. Yudin
18 Identification of Thermal Radiation Properties of Light-Scattering Materials
V.A. Tovstonog
24 Inverse Problems of Radiative Transport in Strongly Scattering, Weakly Absorbing Solids
V.A. Petrov and S.V. Stepanov
32 Optimum Design of Measurements in Parametric Identification of Heat Transfer Processes
Ye.A. Artyukhin

38 Determination of Thermal Boundary Conditions from Data of Temperature Measurements
V.Ye. Abaltusov and I.K. Zharova
45 Transfer of Heat in Compacted Metal Powders
V.A. Gruzdev and Yu.A. Kovalenko
52 Dropwise Condensation on Polymer-Coated Plates and Cylinders
A.P. Burdukov, V.N. Bochagov and A.R. Dorokhov
59 Analytic Approximations of Solutions of Certain Problems of Heat Conduction
V.V. Deyneko
68 Noise Emission by a Supersonic Boundary Layer
A.A. Maslov and N.V. Semenov
75 Spatially Distributed Seismic Wave Reception
V.I. Merkulov
80 Determination of Linear and Angular Characteristics of Periodic Structures on Schlieren Photographs of Supersonic Flows
Ye.M. Maksimova, V.K. Zhuravlev and D.V. Demin
84 Aerophysical Experiments on an M100 Meteorological Rocket under Conditions of Separation of the Boundary Layer by a Forward-Facing Step
A.M. Pavlyuchenko, O.A. Bragin and G.A. Tuchkov
94 A Cylinder Rotating in a Gas Initially at Rest
V.M. Kovalenko and N.M. Bychkov
104 The Minimum Inductance of the Choke in a Plasma-Gun Circuit
P.I. Tamkivi and T.I. Tomson
109 High-Current Hollow-Cathode Vacuum Arcs Thermal Field of the Cathode
V.S. Cherednichenko
114 A New High-Frequency Plasma Ion Source
T.M. Makhkamov, T.D. Radzhabov and N.Yu. Suyarov
118 Effect of the Gas Flow Field Near the Substrate on the Flatness of the Powder-Coated Area
I.Yu. Linenko-Mel'nikov and B.A. Uryukov
129 Separation of Heterogeneous Fliud-Solid Systems in the Case of Breakup of Particles of the Disperse Phase Upon Impact on Solid Surfaces
I.V. Sokolov
135 Analysis of Reliability of Electrical Networks Under Probabilistic-Deterministic Conditions of Variation of Operating Parameters and Network Structure
Yu.N. Kucherov
143 Effect of the Properties of the Stabilization Parameter of Synchronous Generators on the Choice of an Automatic Excitation Controller
V.K. Borovik and S.P. Sarychev

Number 6

1 Aerogasdynamics Research at the Siberian Institute of Theoretical and Applied Mechanics
V.G. Dulov and V.M. Fomin
12 Flows in Vortex Chambers
E.P. Volchkov and V.I. Terekhov
26 Experimental Studies of Electric Arcs in Turbulent Gas Flows
M.F. Zhukov, I.M. Zasypkin and Yu.S. Levitan
53 Numerical Modeling of Cathode Processes in Arc Discharges
A.M. Zimin and V.I. Khvesyuk
61 Tomographic Diagnostics of Low-Temperature Plasmas
T.S. Mel'nikova and V.V. Pikalov
71 Dynamics of Plasma in Dust-Laden Jets Systems. Combined Physical and Numerical Experiment
M.F. Zhukov and O.P. Solonenko
89 Current Physical Problems in the Strength of Solids
V.Ye. Panin
100 Theory of Jet Mixing of Fuel and Air in Diesel Engines
O.N. Lebedev and O.P. Solonenko
108 Pressure Forming of Materials in the Creep and Ultraplasticity Modes
O.V. Sosnin, B.V. Gorev, G.A. Rayevskaya, and A.A. Ratnichkin

116 Effect of Laser Treatment on Structure, Composition and Microhardness of Fe-C-Cr-V Plasma-Deposited Coatings
V.P. Larionov, N.P. Bolotina and T.V. Argunova
120 Derivation of Stable Finite-Element Solutions and New Difference Formulas for Problems in Torsion of Beams and Bending of Plates
Yu.V. Nemirovskiy and A.D. Matveyev
130 System Requirements for Electric Transmission Technology
V.V. Bushuyev, A.Kh. Kalyuzhnyy, L.V. Krechmer, and G.I. Samorodov
135 Vibratory Machines and Processes for Mining and Construction
Ye.I. Shemyakin, A.D. Kostylev, N.P. Ryashentsev and A.Ya. Tishkov
139 Promising Avenues of Research on Machines and Structures Suitable for Operation in Cold Regions
V.P. Larionov
